Forklaring Interpretation

- * "UNAFFECTED" / "FRI" Der er ingen kliniske tegn på den kendte eller formodede arvelige øjensygdom (KP-HED). "AFFECTED": Der er tydelige kliniske tegn på den nævnte sygdom. "Unaffected" signifies that there is no clinical evidence of the presumed inherited eye disease(s) specified, whereas "affected" signifies that there is such evidence.
- ** "Undetermined" / "Tvilsom" Dyret viser kliniske tegn på den kendt eller formodet arvelige øjensygdom, men forandringerne er ikke sikre nok. "Undetermined" The animal displays clinical features that could possibly fit the presumed inherited eye disease(s) mentioned, but the changes are inconclusive.
- *** "Suspicious" / "Mistænkt" Dyret viser mindre, men tydelige kliniske tegn på den kendt eller formodet arvelige øjensygdom. Yderligere udvikling vil kunne bekræfte diagnosen. "Suspicious" The animal displays minor, but specific signs of the presumed inherited eye disease(s) mentioned. Further development will confirm the diagnosis.
